I. INTRODUCTION

1. Objective

- **Explain the purpose of the project — creating a web application for commercial cleaning services. Highlight the motivation for developing the system, such as improving booking efficiency, ensuring transparency in service delivery, and streamlining contracts and payments.**

2. Scope

- **List the system's features:**
 - **Booking cleaning services online.**
 - **Selecting service options (Basic, Pro, Deluxe).**
 - **Managing contracts with examiner oversight.**
 - **Tracking task progress and statuses.**
 - **Processing online and cash payments.**
- **State limitations:**
 - **Limited to one service type per day.**
 - **Each Staff only works for one task in a day.**
 - **Cash and Paypal payments are only accepted in person.**
 - **Limited the main services that the company provides.**

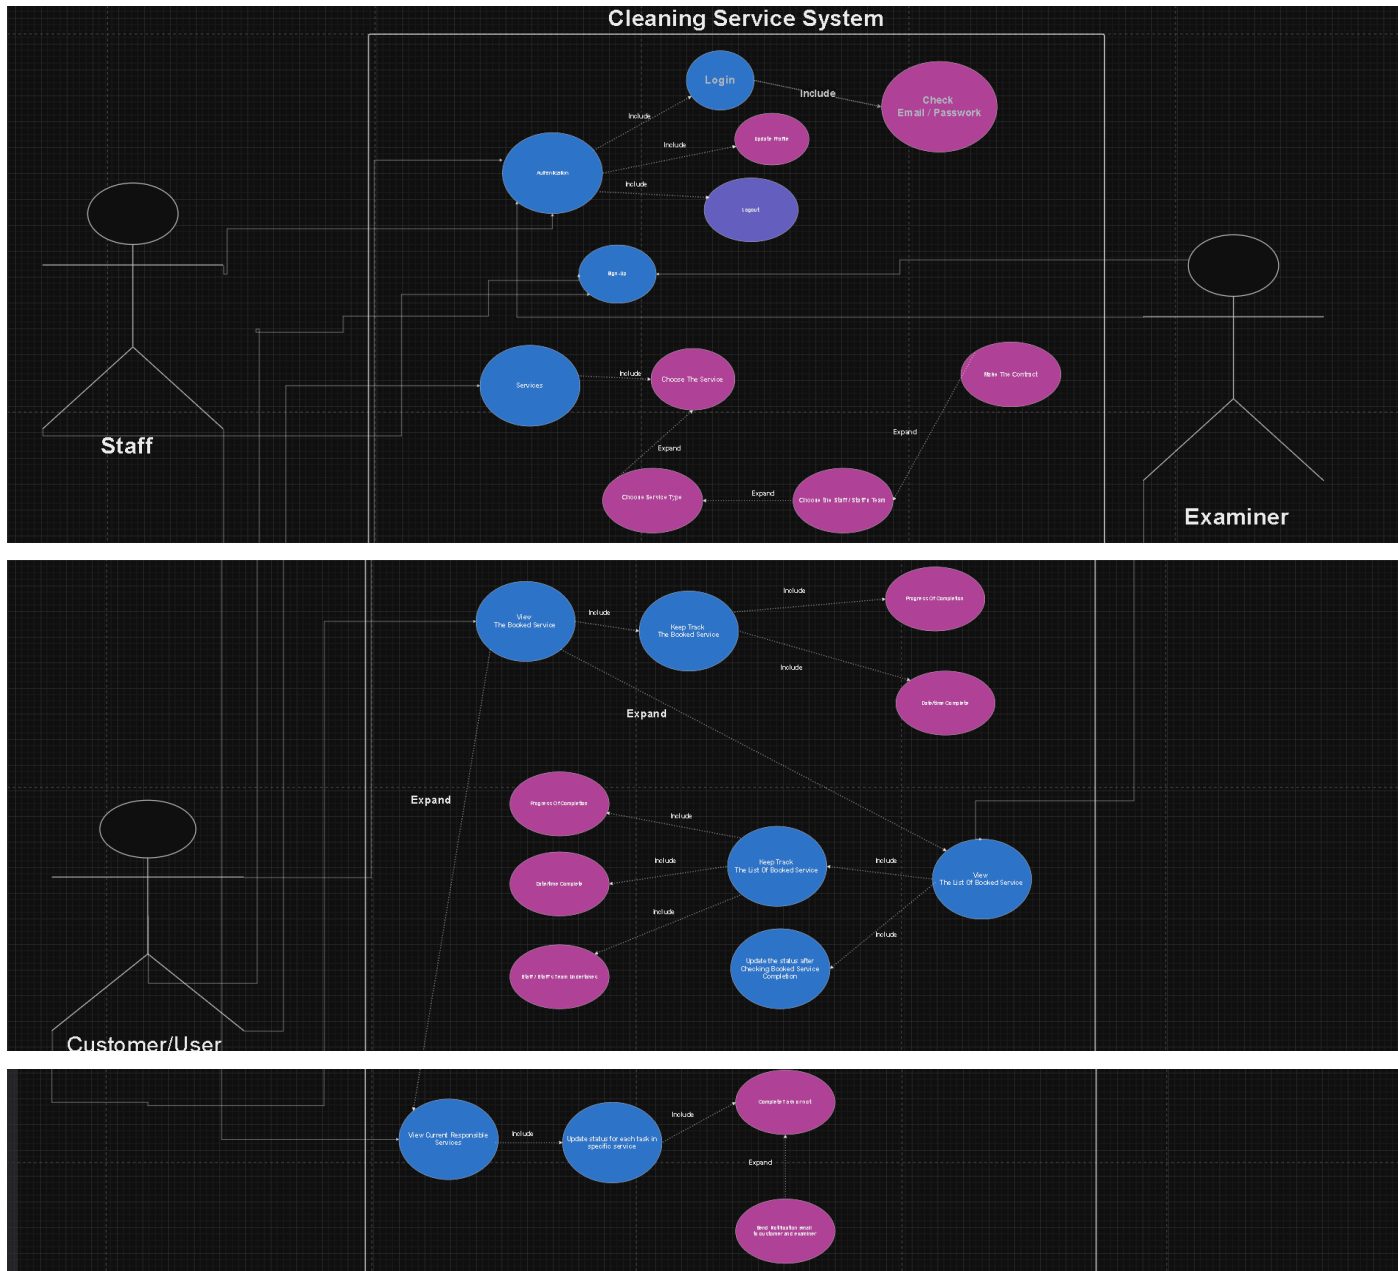

3. Overview

- **The report includes an analysis of system requirements and design, implementation details for different roles, and concludes with a discussion of findings and future recommendations.**

II. REQUIREMENT ANALYSIS AND DESIGN

1. Use Case

- Centralize around the three main actors: User, Staff, Examiner

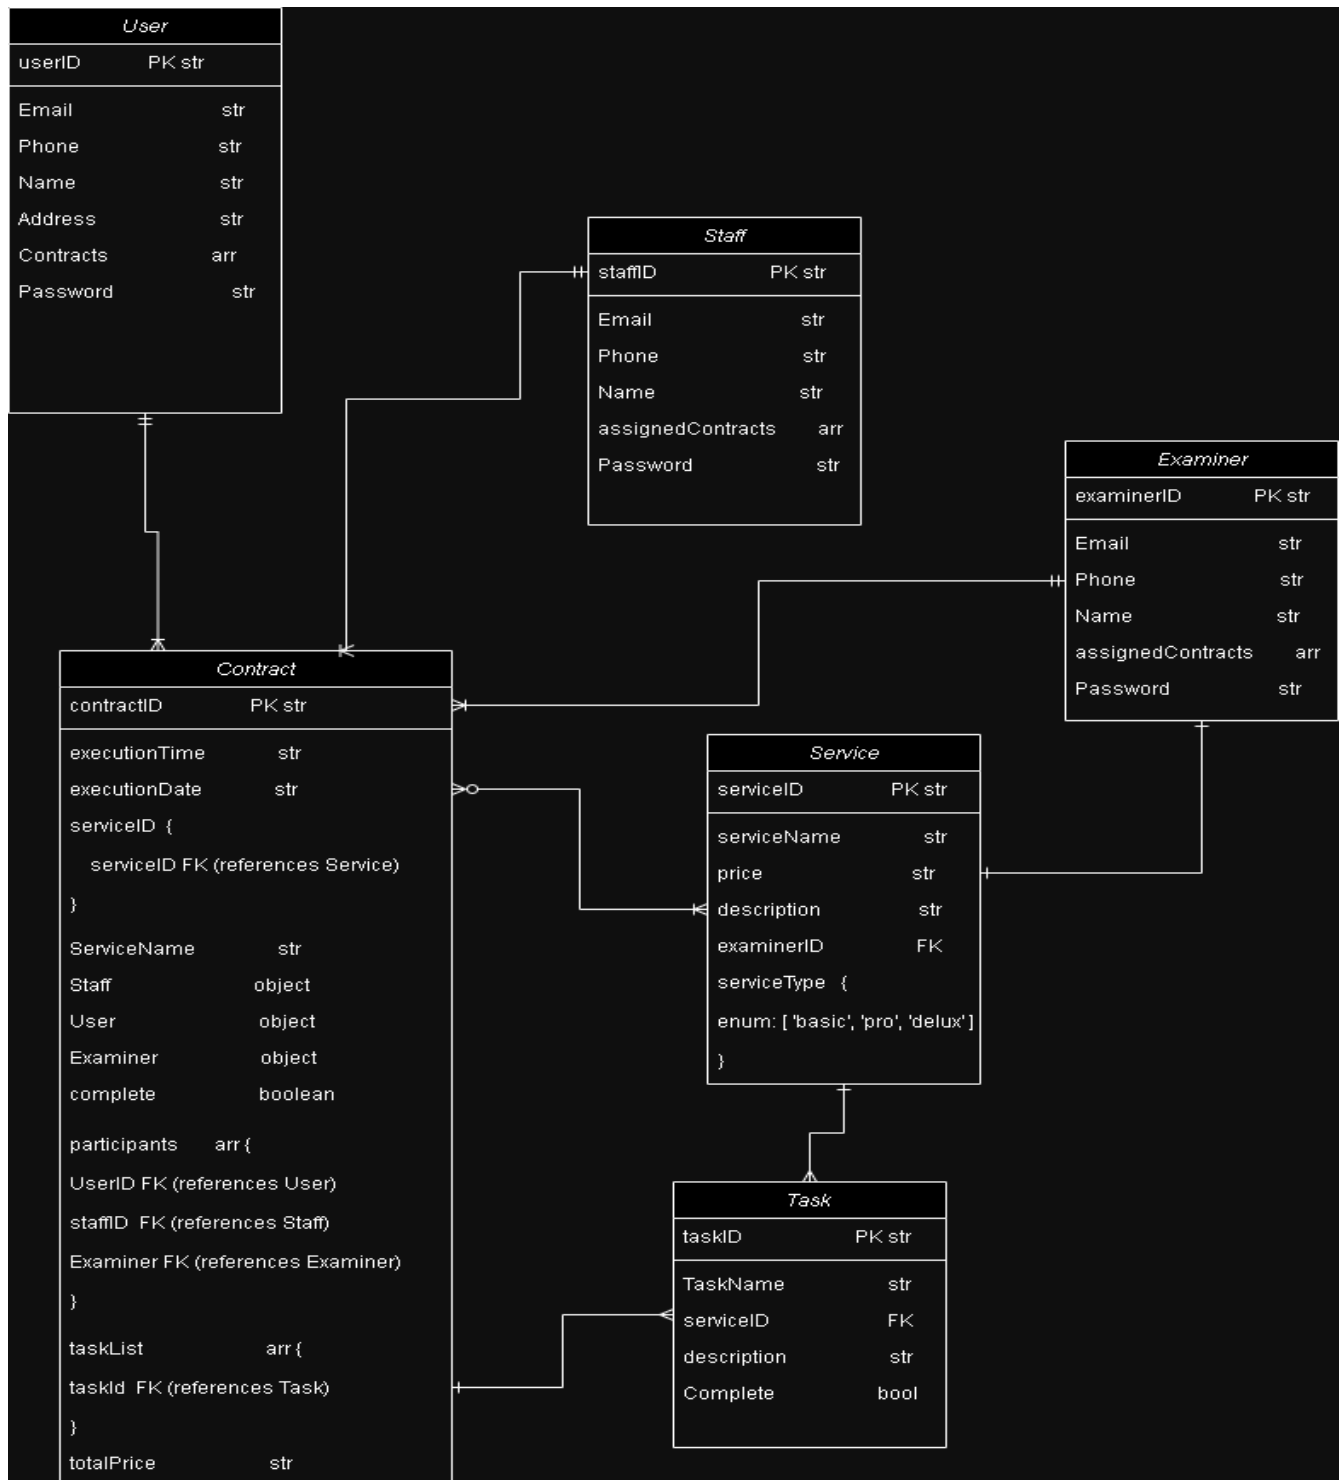

(To see more detail, go to download file [Cleaning_Service_UseCase_Diagram.drawio.png](#))

- **User:**
 - **Log in/register.**
 - **Log out.**
 - **Update profile.**
 - **View services and pricing.**
 - **Book service and make payment.**
 - **Check service and contract status.**

- **Staff:**
 - **Log in to view assigned tasks.**
 - **Log out.**
 - **Update Profile**
 - **Update task status (pending → complete).**

- **Examiner:**
 - **Log in to review tasks.**
 - **Log out.**
 - **Update profile.**
 - **Approve contracts after verification (update contract status).**

2. Database Table Diagram

- **Detailed Model:**

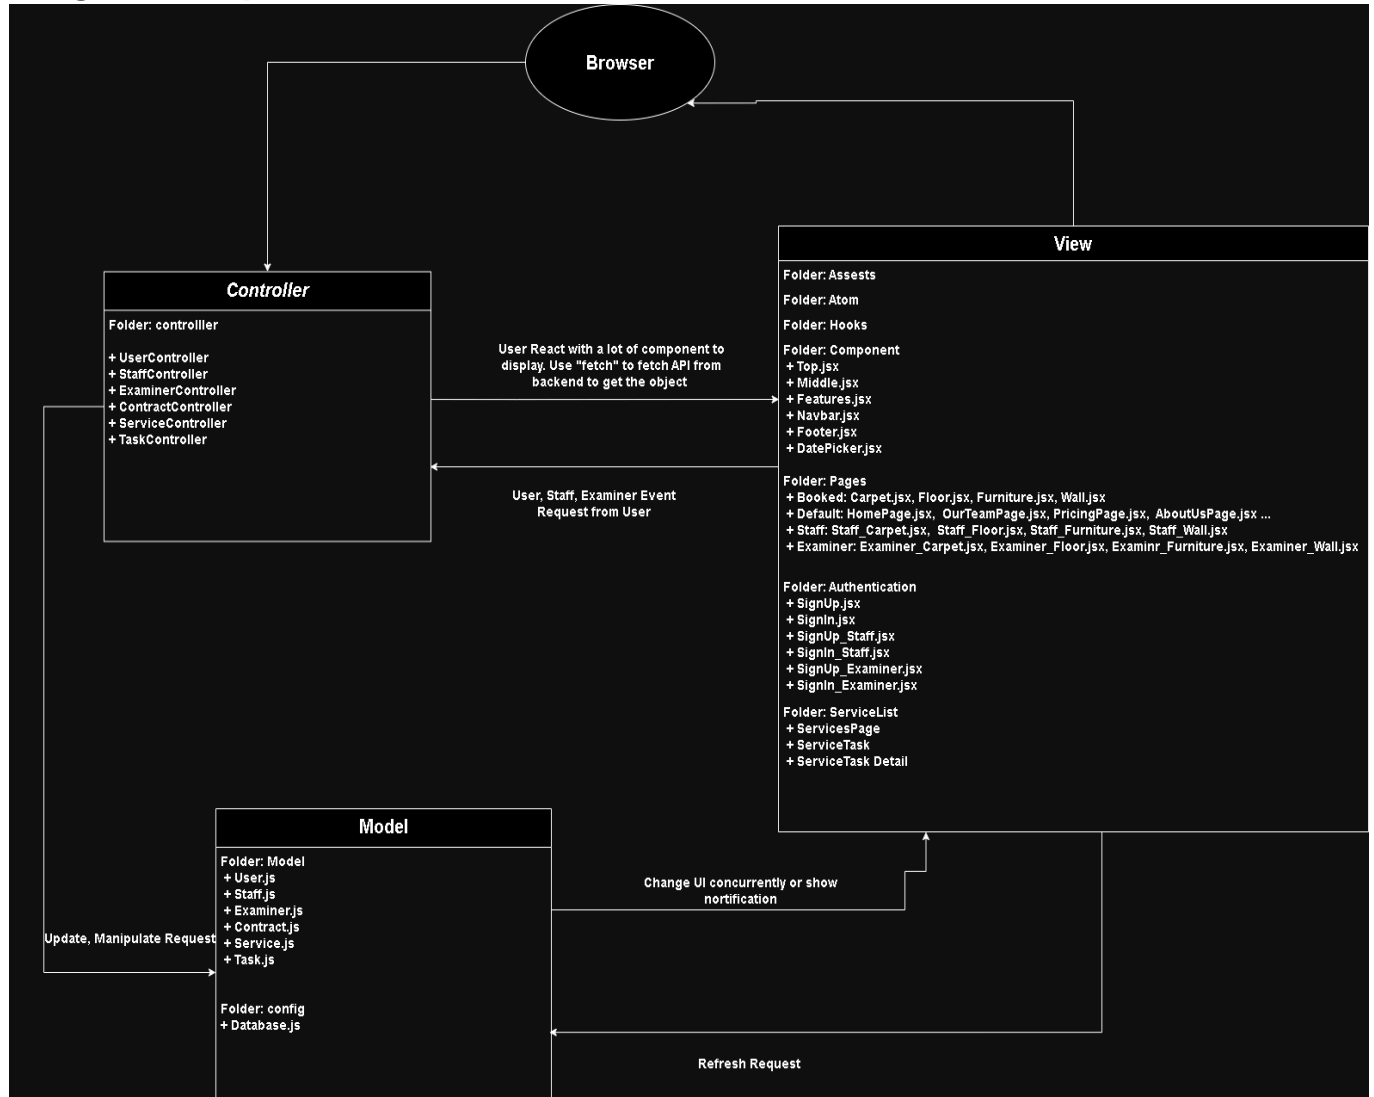

- **User:** id, name, email, password, phone, address, Contract.
- **Staff:** id, name, email, password, phone, address, assignedContract.
- **Examiner:** id, name, email, password, phone, address, assignedContract.
- **Service:** id, serviceType, description, price, examinerID.
- **Task:** id, taskName, serviceID, description, complete.
- **Contract:** id, user, serviceId, staff, examiner, taskList, complete, totalPrice, participants, execution time, execution date.

- **Relationships:**

- **One User → Many Contracts.**
- **One Staff → Many Contracts.**
- **One Examiner → Many Contracts.**
- **One Contract → One Service, Many Tasks.**
- **One Service → Many Tasks.**
- **One Service → One Examiner.**

3. System Architecture

Diagram Components:

- **Presentation Layer (view):**

- **React/HTML pages for users, staff, examiners and default company pages.**
- **Business Logic Layer (controller):**
 - **Node.js backend handling service bookings, task updates, staff, user, examiner action and contract approvals.**
- **Data Layer (model):**
 - **MongoDB database storing data for users, staff, examiner, tasks, and contracts.**

III. IMPLEMENTATION

1. User Role

- **Steps:**
 - **Register/Login.**
 - **View services with pricing and options.**
 - **Book a service:**
 - 1. Select service type (Basic/Pro/Deluxe).**
 - 2. Choose staff for the task.**
 - 3. Confirm booking details.**
 - **Make payment:**
 - 1. Choose between PayPal or cash.**
 - 2. Redirect to PayPal for online payment.**
 - **Track booked services and task statuses.**
- **Pictures:**

- **Screenshots of login forms.**

- **Furniture Cleaning**

The screenshot displays the 'Task Undertake' section of the Beresin website. At the top, a navigation bar includes links for HOME, ABOUT US, SERVICES, OUR TEAM, PRICING PLANS, CUSTOMER APPRECIATE, and SIGN IN. The main heading is 'Task Undertake' with a star icon. Below this is the 'Furniture Cleaning' section, which features five service cards:

- Dusting:** The process of removing dust from surfaces..
- Vacuuming:** Vacuum upholstered furniture to remove dirt and debris.
- Spot cleaning:** Treat stains on furniture with appropriate cleaning solutions.
- Upholstery cleaning:** For deep cleaning, hire a pro or use a steam cleaner.
- Leather conditioning:** Condition leather to keep it soft and supple.

Each service card includes a corresponding icon (e.g., a duster for dusting, a vacuum for vacuuming, etc.).

IV. DISCUSSION AND CONCLUSION

1. Challenges:

- Ensuring real-time updates for task statuses.
- Managing dependencies between staff and examiner workflows.
- Handling overlapping bookings or unavailable staff.

2. Strengths:

- User-friendly interface for all roles.
- Clear task tracking and contract management system.
- Flexible payment options for users.

3. Weaknesses:

- Limited to single-day service contracts.
- Cash and Paypal payments restricted to in-person transactions.
- The main services are not variety and can not recommend the extra options.

V. Assigned Task, GitHub and Deployment

1. Assigned Task
